

# Journey to the Centre of the Earth

Summary taken from:  
<https://www.goodreads.com/>

*“We are about to begin an extraordinary journey,”*  
said **Professor Lidenbrock**,  
*“nothing less than an expedition to the centre of the earth!”*

With those words the professor, his nephew **Axel** and their guide **Hans** climbed down into an extinct volcano crater, and began an amazing subterranean odyssey.

Living examples of extinct monsters, an underground ocean and a terrifying journey on the back of an erupting volcano are all part of **Jules Verne’s** most extraordinary epic of science fiction.
